

SEE A PHISHING EMAIL?

Alert a coworker!

In order to remain secure and alert of all cyber threats, we need to work together! **NEVER** forward a potential phishing email to anyone, rather, see the below tips to keep your coworkers alert.

- Send a screenshot of your suspected phishing email to coworkers to alert them of potential phishing
- Discuss a scammy email on a team meeting
- Send a chat/give a call to alert others who you think could receive a similar sketchy email
- If you're ever unsure of an email, **CHECK WITH A COWORKER FIRST**, before clicking on anything

Let's each do our part to keep each other secure!
