

Personalized second opinions

Our proactive outreach team is ready to help

Facing a difficult health situation can be overwhelming, but you don't have to do it alone. Your 2nd.MD Care Team can connect you with expert specialists for a video second opinion consultation, providing valuable insights that will help to identify the right diagnosis, explore treatment options, or confirm if surgery is necessary.

If your insurance informs us that you or a covered family member has received a diagnosis, we may reach out to discuss how a second opinion can improve your health outcome and experience.

How it works:

- 1 One of our Health Advocates will reach out to you via email or phone to introduce you to the services available through 2nd.MD.
- 2 A specialized nurse will work with you to understand your health goals and confirm if a second opinion is right for you.
- 3 You'll have a virtual second opinion consultation with a top specialist in your condition to learn more about your diagnosis and find the best treatment plan.

HomeServices of America provides access to 2nd.MD services at no additional cost to you and your family members covered by the UnitedHealthcare or Surest medical plan.
